

# KOALA NATURAL BEDDING

Koala Natural Bedding mattresses are made of all natural materials with zero foam. In a sea of mattresses made with polyurethane based foams, this is one of the few mattresses available today that uses only tried and true, eco-friendly comfort materials, and an organic cotton quilt. Natural components tend to be a lot more durable than blends and synthetics, so you'll enjoy a longer mattress lifespan without wear-related support issues. This mattress collection is built in Grand Rapids, Michigan, and it comes backed by a generous 10-year warranty.
